

Frontend Design Challenge — AAROHAN

Problem Statement

A fictional event named **Aarohan** is taking place at a hypothetical institution called **Benedict College of Engineering and Technology**.

Participants are required to design and develop a **frontend-only website** for this event.

Apart from the event name (**Aarohan**) and the college name (**Benedict College of Engineering and Technology**), **no additional details are predefined**.

Participants are expected to use their **imagination, observation, and creativity** to decide the nature of the event, its theme, content, structure, and presentation.

Task

Design and build a **frontend website** that represents the event **Aarohan** as you envision it.

You are free to decide:

- The type of event
 - Event theme and branding
 - Content sections
 - Layout, visual style, and interactions
-

Rules & Constraints

- **Frontend only** (HTML, CSS, JavaScript, any frontend framework allowed)
 - **backend or APIs not required**
 - Static or client-side only
 - Time limit: **3 hours**
 - Participants may use **any tools**, including AI-based tools, design tools, or code generators
-

Judging Criteria

The submissions will be evaluated based on:

- Overall design quality
- Visual consistency and layout
- Creativity and originality
- Clarity of presentation
- Completeness of the website
- Responsiveness
- Accessibility
- Mobile friendly

The **judges' decision will be final** and binding.

No additional clarifications or justifications will be provided after results are announced.

Important Notes

- There is **no single correct solution**
- The challenge is intentionally **open-ended**
- Both beginners and advanced participants are expected to interpret the problem in their own way
- Use of AI or external tools **does not guarantee higher scores**; evaluation is based on the final output
